Hello, this is Selva, a first-semester student on ACM-PESUECC's design team :D

The tools I use:
Adobe Express
Adobe Photoshop
Figma (Currently learning)

Here's my portfolio for your reference:

<u>YouTube and Other stuff: (2019-2022)</u>

I've been designing logos and banners for my friends and myself for our YT channels and other random stuff, so here are a few samples:

(I made this one for my friends xD)

My Music channel banner

My Logo

PYROKINESIS

WE LIT 'EM UP!

A logo that I had designed for my school's band

Hacknight 6.0:(2024)

I had the opportunity to design a few stickers, the invitation and also contribute to this year's official hoodie:

**Invitation (Attached below):**

Stickers

Hoodie:

I had presented a mock-up for this year's hoodie:

Although this design wasn't final, I was glad to contribute to the quote on the front:

I would also be happy to help with **Operations**, since I'm enthusiastic about event management and helping people around, being a small part of a bigger picture, and with **Social media**, thanks to my experience making YT videos and reels.

Thanking you,
Regards,
Selvaganesh A
